

UNIVERSAL SERIAL BUS (USB) FOOT SWITCH

Linemaster has entered the world of USB, offering various wired and wireless Universal Serial Bus foot switches to suit most applications. Many new applications involve the integration of controls into a PC and Linemaster now

provides a compatible foot switch. Perform multiple functions like emulating a mouse or keyboard keystroke with your feet while freeing up your hands to perform additional operations. Certain models are field programmable. They are supplied with software that allows the

user to program the foot switch quickly and easily. Also available are custom pre-programmed switches that are supplied ready to go straight from the factory. Life is easier with a USB connection, it is as simple as plug and play. Only from Linemaster, American made innovation at work.
